**PRE-FINAL
PROGRAM**

PREFACE

The 26th anniversary of this excellent meeting deals with current evidence in cardiovascular diseases and presents still existing controversies in form of pro&con debates.

This meeting is special with several aspects: The international faculty is participating only for travel support and accommodation, because of the extraordinary interactive and educational character of the meeting.

The mainly Austrian, German and Swiss audience consists of opinion leaders, but also offers young colleagues, cardiologists and intensivists in education, the opportunity to present their scientific data in selected high-quality abstracts in front of an international expert group – a situation that is rarely existent even in highly qualified international meetings.

The organizers are highly respected international experts and have recently invited Prof. Dr. Holger Thiele (current president of the German Society of Cardiology) into their group.

We need to thank the Austrian and international industry for their long-lasting support of this meeting. Some industry partners were present from the first meeting on.

And we thank the editor of the European Heart Journal, Prof. Dr. Filippo Crea for inviting the organizers to write a summary of experience after 25 successful years for CardioPulse, which hopefully will attract experts, audience and industry for visiting and supporting future international meetings of Integrated Management of Acute and Chronic Cardiovascular Diseases.
